

Counter-weight

IMPROVE THE STABILITY OF YOUR TRACTOR

The counter-weight improves the stability of the tractor/loader unit. Connection and disconnection is simply done using the attached coupling shaft.

The counter-weight helps to:

- improve stability and the distribution of weight
- lower the loads on front wheels and axle
- improve ground contact, which in turn improves traction

COUNTER-WEIGHT

WEIGHT, EMPTY

WEIGHT, FILLED (NOT FACTORY FILLED)

186 KG

800 KG WITH CONCRETE

212 KG

1000-1200 KG WITH CONCRETE
